DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-7 are rejected under 35 U.S.C. § 102(b) as being anticipated by Stanford. (U.S. Patent 5,357,448)

Re claims 1, 4-7, with reference to col.1, lines 16-25; col.8, line 25 – col.12, line 50, Stanford discloses the instant claimed method for a digital printing press, the method comprising estimating an ink thickness control parameter based on current and past measurements of at least one state parameter of the digital printing press. As broadly interpreted, the initial calibration parameter disclosed in Stanford is equating to the claimed past measurement parameter because the Stanford initial parameter being replaced as interpolation process being performed. The same rationale is made for Stanford operating parameter as it is equating to the claimed current measurement parameter) wherein the past measurements are used to generate an estimation model; and wherein the model is applied to the current measurement of the at least one state parameter of the digital printing press; wherein the model is based on at least an ink

thickness measurement, wherein the ink thickness measurement is inferred from a measurement of optical density, wherein the method further comprises updating the model with additional measurements.

Allowable Subject Matter

3. Claims 12-17, 29-36 are allowed over the prior art of record.
4. Claims 2-3, 8-10, 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Patent Application Information Retrieval (PAIR)

5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Response to Amendment

6. Applicant's amendment and declaration filed December 18, 2007 have been entered and fully considered.
7. Applicant's request for reconsideration of the finality of the rejection of the last Office action in view of the submission of the Rule 131 Declaration is persuasive and,

therefore, the finality of that action is withdrawn. However, arguments with respect to claims 1-10, 12-17, 28-36 are moot in view of the new ground(s) of rejection.
